Open access through transformative agreements

Australia, Austria, Canada,
Colombia, Croatia, Czechia,
Finland, Germany, Greece,
Hong Kong, Hungary, Italy,
Ireland, Israel, Lithuania, Mexico,
Netherlands, New Zealand,
Poland, Portugal, Saudi Arabia,
Slovenia, South Africa, Spain,
Sweden, Switzerland,
United Kingdom, US

We now have transformative agreements with over 500 institutions in 28 countries and see them as key to accelerating the open access transition.

What's included in your transformative agreement?

- ✓ Continued read access to all content in IOPscience extra at iopscience.org
- ✓ Unlimited open access publications for all corresponding authors from member institutions
- ✓ Publish in more than 70 journals; fully open access, hybrid titles and partner publications
- ✓ Letters, papers, reviews and special issue articles are all eligible
- ✓ No administration required by researchers or library staff

How to publish under the agreement

It's as simple as this:

How to publish under the agreement

- We identify that articles are eligible using the affiliation of the corresponding author
- To be eligible, the article should be accepted within the licence term
- During the peer-review process, or shortly after acceptance we will write to the corresponding author to let them know we will publish the article open access
- Articles are automatically opted in to open access. Although the author can still opt out, this is very rare.

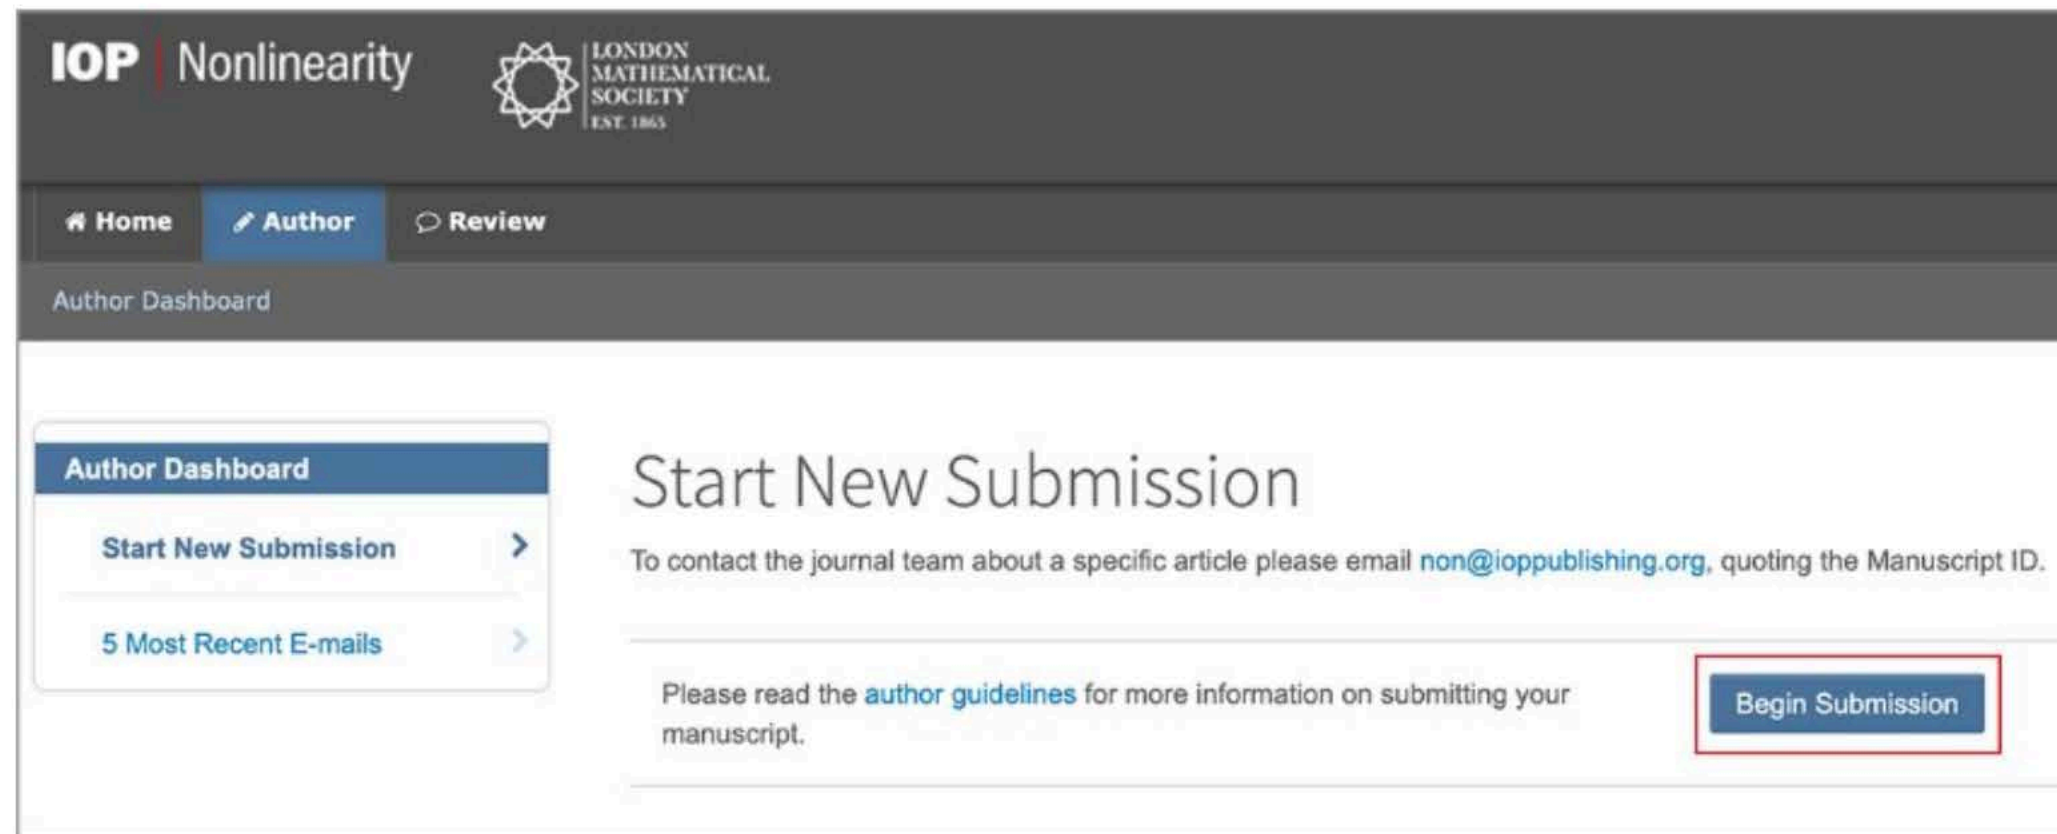

The corresponding author is the one that submits the manuscript, and is responsible for communicating with the journal during the submission, peer review and publication process.

Author Guide

When ready to start the submission, follow steps 1-4 on our submission system; **ScholarOne**.

TA author guide

The submission process will vary on some of our society partner journals.

Providing author information

Step 4: Author Information

Please enter information for **all** co-authors, ensuring names, emails and affiliations are accurate. Changes to author lists after submission are only made in exceptional circumstances and are subject to approval by editorial staff.

More advice and support on adding author information is available, including who should be listed as a co-author, how to check if your co-author already has an account, and guidance for names with Chinese, Korean or Japanese characters.

Please do not share your login details with co-authors, who will receive their own login information if they do not already have accounts with the journal.

*For papers with more than ten authors, please add information for the first ten authors.

* = Required Fields

Open Researcher and Contributor ID (ORCID) is a non-profit organization dedicated to solving the long-standing name ambiguity problem in scholarly communication by creating a central registry of unique identifiers for individual researchers and an open, transparent linking mechanism between ORCID and other current author identifier schemes. To learn more about ORCID, please visit <http://orcid.org/content/initiative>

Create an ORCID ID
Associate your existing ORCID ID

The corresponding (submitting) author will need to make sure their affiliation is clearly stated on the submission form (use the autofill) and on the article itself.

* Selected Authors ⓘ

2. Attach File

Funding for Research ⓘ

* Is there funding to report for this submission?

☒ Yes ☐ No

Funders ⓘ

ACTIONS	FUNDER	GRANT / AWARD NUMBER
No Funders Entered		
Add Funder		

At **step 6** you can declare any funding you received to do your research.

Open access choice

Open Access Pricing

An article publication charge (APC) applies if you choose open access and your article is accepted for publication following independent peer review. You can visit our [paying for open access](#) pages or ask your institution/funder to see if financial support is available for open access publication.

Authors based in countries categorised by the World Bank as low income can publish open access in this journal with no APC. Eligible low-income countries (Group A) are listed on this [page](#).

Will my institution pay my fees?

We have open access agreements with institutions and funders that may cover applicable APCs at no cost to you. To see if your institution has an agreement that covers this journal, please check via the [IOPP Journal Finder](#), our [website](#) or with your librarian. Whichever option you choose below, IOP Publishing will investigate whether you are eligible for funding and if we identify that you are, we will contact you separately to let you know.

*** Do you wish to choose open access for your article?**

Please supply the relevant detail to qualify for discounted rates.

Open Access Choice	Additional
<input type="radio"/> No , I do not wish to choose open access (your article will be accessible to subscribers only)	
<input type="radio"/> Yes : I acknowledge that the standard article publication charge is payable if my article is accepted (unless all authors are based in World Bank Group A countries).	
<input type="radio"/> Yes : I acknowledge that the reduced article publication charge for authors from World Bank Group B countries is payable if my article is accepted. Enter your valid country/region on the right. More details here .	<input type="text"/>
<input type="radio"/> Yes : I acknowledge that there is an article publication charge payable if my article is accepted, and I will claim a reviewer discount of 10%. Enter the ID of the IOP Publishing article you have reviewed.	<input type="text"/>

Whichever OA option is chosen, IOP will always identify whether an article is eligible for the TA.

Keeping authors updated

Funding via your library may be available

Visit iopscience.org | [Read this e-mail online](#) | [Add us to your safe sender list](#)

IOP Publishing

Dear Example Salutation,

Re: Example Article

Article reference: *Example Article Id*

IOP Publishing and your institution/funder have an open access agreement that promotes sustainable open access and may cover the article publication charge (APC) for your paper in *Example Journal1*.

We have therefore made your article open access to take advantage of this agreement. It will be published with a CC-BY licence. Please choose the Gold Open Access option when completing your Assignment of Copyright form.

If you do not want to publish your article open access, you will need to opt out prior to acceptance by notifying openaccesscharging@iopublishing.org.

Visit our [Open Physics](#) website to learn more about the ways we are supporting open access to enable wider and faster access to physical sciences research.

Common questions

[What is an open access agreement?](#)

[What is my institution or funder's open access policy?](#)

[What is a hybrid journal?](#)

[Where can I learn more about copyright?](#)

Please inform openaccesscharging@iopublishing.org if you believe you have received this message in error.

Yours sincerely,

Transformative Agreement team

[IOP Publishing](#)

openaccesscharging@iopublishing.org

After the first round of peer review, we identify eligible articles.

We'll email the corresponding author informing them of their inclusion in the agreement.

The subject line will be: 'Open access options for your article: article ID'

No opt-in action is needed.

Signing copyright

The author will be asked to sign an open access copyright form and once the article is accepted it will be published open access under the terms of the institutional agreement.

Nanotechnology aims to publish original research at the forefront of nanoscale science and technology across all disciplines. The journal's scope encompasses the study of both fundamental phenomena at the nanoscale and applications of these phenomena. **'Nanotechnology'** is taken to include the ability to individually address, control, and modify structures, materials and devices with nanometre precision, and the synthesis of such structures into systems of micro-and macroscopic dimensions such as MEMS based devices.

To be publishable in the journal, articles must meet the highest scientific quality standards, contain significant and original new science, and make substantial advances in nanoscale science and technology. Research on the synthesis of materials should contain a significant innovation either in methodology, materials or demonstrated application. To ensure high editorial standards, every submitted article is initially assessed by the editors of the journal before being sent to independent referees. Articles can be rejected without refereeing after this initial assessment by the editors. Due to the high volume of papers that we receive, we regret that we are unable to provide feedback on individual articles. Authors appealing against the decision will have to demonstrate to the Editorial Board of the journal at nano@ioppublishing.org that their paper contains significant new science of high quality and interest.

Identification

- We use historic submission data to inform the identification process
- Automatic - authors do not need to do anything
- We proactively sweep for missed opportunities
- Articles can be made OA retrospectively, as and when they come up – authors have to agree
- Wherever possible we make librarians aware of author opt-outs in real time

Reporting

- Quarterly reporting sent direct to you
- Full list of included articles and key metadata
- Author, Title, Journal, DOI, Accept date, Funder (if provided) etc...

Agreement	Institution Name	OA Type	DOI	Title	Journal Name
Canada - CRKN	The University of Winnipeg	Gold	10.1088/1748-9326/ac462f	Spring coherence in dissolved organic carbon export dominates total coherence in Boreal Shield forested catchments	Environmental Research Letters
Canada - CRKN	Western University	Gold	10.1088/2632-959X/ac4668	Bouncing dynamics of electrostatically actuated NEM switches	Nano Express
Canada - CRKN	University of Saskatchewan	Gold	10.1088/2515-7620/ac4bab	Dynamics of water–energy–food nexus interactions with climate change and policy options	Environmental Research Communications
Canada - CRKN	University of Waterloo	Gold	10.1088/1748-9326/ac4cf3	Windows into the past: lake sediment phosphorus trajectories act as integrated archives of watershed disturbance legacies over centennial scales	Environmental Research Letters
Canada - CRKN	St Francis Xavier University	Hybrid	10.1088/1361-6382/ac4fbb	Exactly solvable 2D model for photon propagation in curved space: loss of interference and bell inequality violation	Classical and Quantum Gravity
Canada - CRKN	University of Waterloo	Gold	10.1088/2515-7620/ac53c2	The definition of the non–growing season matters: a case study of net ecosystem carbon exchange from a Canadian peatland	Environmental Research Communications

The benefits of open access publishing

- Increased exposure and impact in the physical sciences community
- Easier to apply research findings
- Growth in article downloads, citations, attention scores
- Compliance with expanding open access grant rules
- Expanding scientific equality
- Public can immediately access research
- Research can influence public policy
- Greater value for taxpayers
- Enhances the reputation of library services

Declaring funding

A guide to submitting under a transformative agreement

Home > A guide to submitting under a transformative agreement

SHARE THIS PAGE:

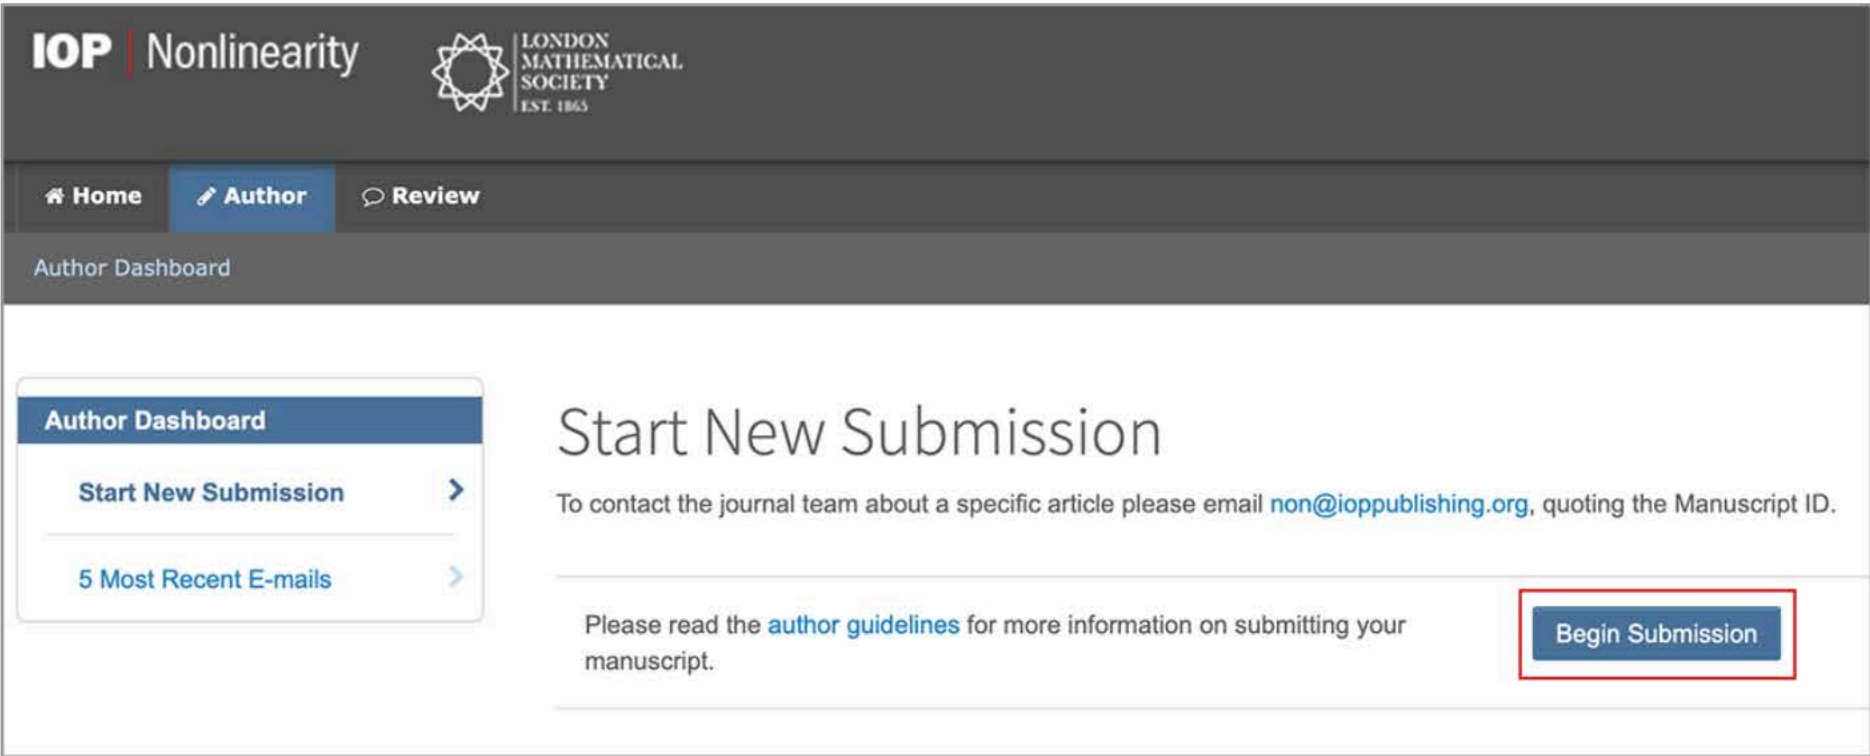

To see if your institution is covered by a transformative agreement, or to check compliance with funder requirements, you can use the IOPP Journal Finder tool.

Go to IOPP Journal Finder

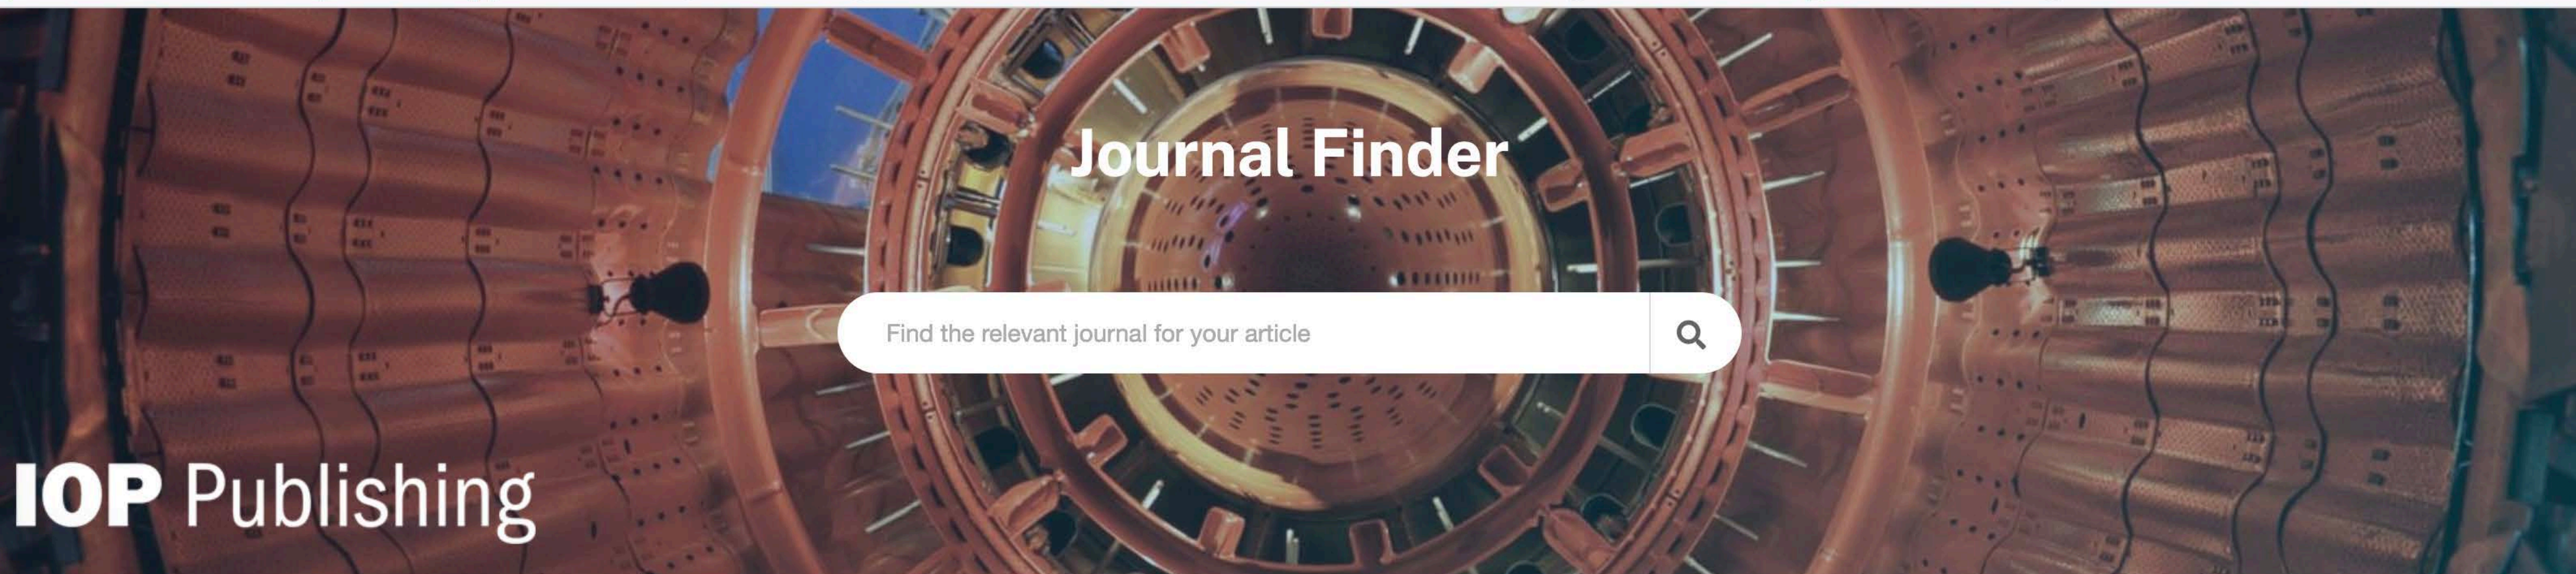

Alternatively, visit '[Transformative and institutional open access agreements](#)' and select the agreement you may be covered by. Each agreement page lists all of the member institutions and eligible journals.

When you are ready to start your submission, follow **steps 1-4** on our submission system; ScholarOne. Note: a small number of eligible journals do not use the ScholarOne submission system.

At **step 4** you'll be asked to enter author information. As the corresponding (submitting) author you'll need to make sure your affiliation is clearly stated on the submission form. Use the **autofill** to provide your institution name.

The corresponding author is the author that submits the manuscript, and is responsible for communicating with the journal during the submission, peer review and publication process.

Researchers from institutions within the CRUI consortium

[Home](#) > Researchers from institutions within the CRUI consortium

IOP Publishing (IOP) has a transformative agreement with institutions within the CRUI consortium to enable a transition to open access publishing.

Who can benefit?

All corresponding authors that are current staff members, researchers (permanent, temporary and visiting), or students at one of the institutions below at the time of acceptance, can publish open access at no cost to themselves. The corresponding author is the author that submits the manuscript and is responsible for communicating with the journal during the submission, peer review and publication process.

What's included?

- Articles accepted from **1st January 2023** will be eligible for transformative agreement funding to enable authors to publish open access with no cost to themselves
- Research paper, special issue, letter and review article types
- Included journals are those in lists **A, B, C and D**. [Click here for a full title list of eligible journals](#).

Please note

A small number of journals attract additional charges including but not limited to, page charges. These remain payable by the authors.

You may find our author guide for [submitting under a transformative agreement](#) helpful located in our [Transformative Agreement hub](#).

Resources for transformative agreements

[Home](#) > Resources for transformative agreements

The transition to open access presents significant change for library staff and authors. Having worked with hundreds of librarians and institutions on that journey, we are well placed to support you through the process. We signed the first open access agreement with Austria in 2014, and since then we've been expanding our commitment to open access. Today we support more than 300 institutions to open up their research through transformative agreements.

Your library toolkit

If your institution has a transformative agreement, this free toolkit will help you promote it to everyone who can benefit from it. The toolkit includes an editable leaflet, poster, and e-mail template, as well as artwork which you can use for social media or a banner advertisement.

[Download your toolkit here \(4.7MB\)](#)

If you would like to request something specific, or would like personalised versions of any of the materials here, please e-mail us at library.relations@ioppublishing.org.

Training events

Sign up for forthcoming or on-demand events using the links below:

[How to get published – a webinar for Canadian researchers](#)

Find out how to take advantage of our agreement with Canadian Research Knowledge Network, providing open access publishing for researchers at more than 40 institutions in Canada.

Why publish under a transformative agreement?

As well as removing the administrative burden of dealing with invoices for article publication charges, authors can benefit from greater visibility and impact for their research. IOPP's open access articles typically receive **81% higher downloads** and **31% higher citations** when compared with non-open access articles.

This video explains the benefits in a clear and simple way:

ANNOUNCEMENT

IOP Publishing's response to the OSTP memorandum on Ensuring Free, Immediate, and Equitable Access to Federally Funded Research

Iscrizione alla riunione

Argomento **Peer Review Excellence with IOP and Prof Duccio Rocchini**

Descrizione You are invited to join our interactive peer review workshop, co-chaired by Duccio Rocchini (Universita di Bologna) and IOP Publishing.

- Learn about peer review fundamentals and ethics from experts
- Gain practical experience of reviewing a manuscript
- Take the first step towards IOP trusted reviewer certification

On completion of the course, you will receive a workshop attendance certificate.

Duration: 3 hours (including a practical exercise and short break)

The workshop will focus on key aspects of peer review in the materials sciences, including:

- Peer review fundamentals
- Models of peer review
- How to become a peer reviewer
- How to write an excellent reviewer report
- How to spot and respond to research misconduct

We look forward to welcoming you to the workshop.
